

AURELIAN CERNEA

Data și locul nașterii:
Naționalitatea: Română.
Limbi străine: Engleză, Franceză.

Studii

- 1974-1982 Școala cu clasele I-VIII nr.21, Ploiești,
- 1982-1986 Liceul "I.L.Cărăiale", Ploiești, secția matematică-fizică,
- 1986-1987 Stagiul militar cu termen redus la U.M. 01184, Bacău,
- 1987-1992 Facultatea de Matematică, Universitatea București (absolvită cu medie 10.00),
- 1992-1993 Diplomă de studii aprofundate, Universitatea Paris XI, Franța,
- 1994-1995 Doctorat în Matematică, Universitatea București.

Activitatea profesională

15 iulie 1993 - 1 august 1994 asistent de cercetare stagiar, Institutul de Matematică, Academia Română,

1 august 1994 - 1 decembrie 1995 asistent de cercetare, Institutul de Matematică, Academia Română,

1 decembrie 1995 - 1 martie 1998 cercetător științific, Institutul de Matematică, Academia Română,

1 martie 1998 - 1 octombrie 1998 cercetător științific principal III, Institutul de Matematică, Academia Română,

1 octombrie 1998 - 18 februarie 2002 lector universitar, Facultatea de Matematică, Universitatea din București,

18 februarie 2002 - 1 octombrie 2009 conferențiar universitar, Facultatea de Matematică, Universitatea din București,

1 octombrie 2009 - profesor universitar, Facultatea de Matematică și Informatică, Universitatea din București.

Domenii științifice de interes

Ecuații diferențiale, Incluziuni diferențiale, Teoria controlului optimal, Analiza fără netezime, Teoria viabilității.

Activitatea științifică

- cărți: 8
- articole științifice: 247
- expuneri la conferințe internaționale: 85
- expuneri la manifestări științifice naționale: 21
- expuneri la manifestări științifice online: 4

Participări la activități științifice internaționale

- expuneri la conferințe internaționale desfășurate în străinătate:

Paris (Franța) 1994; Brno (Cehia) 1997, 2009; Varșovia (Polonia) 1997; Levico Terme (Italia) 1998; Metz (Franța) 1998; Vișegrád (Ungaria) 1999; Torun (Polonia) 1999; Barcelona (Spania) 2000; Aveiro (Portugalia) 2000, 2006, 2016; Praga (Cehia) 2001, 2013; Notre Dame, Indiana (S.U.A.) 2002; Perpignan (Franța) 2002, 2016; Roscoff (Franța) 2003; Hasselt (Belgia) 2003; Bedlewo (Polonia) 2004; Delft (Olanda) 2004; Stockholm (Suedia) 2004; Bratislava (Slovacia) 2005, 2017; Borovets (Bulgaria) 2005; Viena (Austria) 2006, 2007; Madrid (Spania) 2006, 2014; Budapesta (Ungaria) 2007, 2010, 2012; Amsterdam (Olanda) 2008; Poitiers (Franța) 2010; Loughborough (Marea Britanie) 2011; Lyon (Franța) 2014; Amadora (Portugalia) 2015, 2017; Szeged (Ungaria) 2015, 2019; Istanbul (Turcia) 2015; Erice (Italia) 2016; Novi Sad (Serbia) 2016; Sofia (Bulgaria) 2017; Cracovia (Polonia) 2018; Taipei (Taiwan) 2018; Santiago de Compostela (Spania) 2018; Lisabona (Portugalia) 2019.

- expuneri la conferințe internaționale desfășurate în țară:

Cluj-Napoca 1994, 1996, 2004, 2007, 2011, 2012, 2015; Ilieși 1995; București 1995, 2007, 2012, 2013; Constanța 1996, 1997, 1998, 2002, 2005, 2009, 2019; Băile Felix 2001; Pitești 2003; Iași 2006, 2012, 2015; Brașov 2008, 2011, 2014, 2016, 2018; Baia Mare 2008; Sinaia 2009, 2013; Alba Iulia 2013; Craiova 2016; Galați 2019; Târgoviște 2019.

- burse Tempus:

Universitatea Paris XI, Franța: 1 octombrie 1992- 31 iulie 1993, 1 octombrie 1993- 31 martie 1994.

- burse postdoctorale:

Universitatea Aveiro, Portugalia: 1 iulie - 30 septembrie 2000;

Ecole Polytechnique, Paris, Franța: 2 martie - 31 mai 2003, 25 februarie - 24 mai 2004.

- participări la conferințe, vizite, cursuri, școli de vară în străinătate:

Varșovia (Polonia) 1991, 2001; Montreal (Canada) 1992; Paris (Franța) 2013; Perpignan (Franța) 2016.

Activitatea didactică

Cursuri ținute la Facultatea de Matematică și Informatică a Universității București: Ecuații diferențiale, Ecuații diferențiale și integrale, Ecuații cu derivate parțiale, Ecuații diferențiale și cu derivate parțiale, Control optimal și aplicații, Equations différentielles et intégrales.

Distincții

Premiul „Spiru Haret” al Academiei Române pe anul 2003.

Diplome ale Universității din București pentru activitatea de cercetare științifică în anii 2005, 2006, 2007, 2008.

Membru corespondent al Academiei Oamenilor de Știință din România (din 26 mai 2016). [Membru asociat: 26 martie 2015 - 26 mai 2016].

Alte activități

Conducător de doctorat (din 2011).

Cercetător științific I, Facultatea de Științe Aplicate, Universitatea „Politehnica” din București (5 octombrie 2011 - 4 octombrie 2016).

Membru în Comitetul Editorial al revistei „Annals of the Academy of Romanian Scientists, Series on Mathematics and its Applications” (din 2012).

Membru în Comitetul Științific al „Seminarul Itinerant Românesc de Analiză Matematică și Aplicațiile Sale” (din 2017).

Mentor pentru cercetători postdoctorali: 1 (Universitatea București).

Membru în comisii de abilitare: 6 (1 - Universitatea „Babeș-Bolyai” Cluj-Napoca, 3 - Academia Română București, 1 - Universitatea București, 1 - Universitatea de Vest Timișoara).

Membru în comisii de doctorat: 19 (2 - Universitatea București, 7 - Universitatea „Babeș-Bolyai” Cluj-Napoca, 1 - Universitatea Tehnică Cluj-Napoca, 1 - Universitatea „Al. I. Cuza” Iași, 2 - Academia Română București, 2 - Government College University Lahore Pakistan, 3 - Universitatea Politehnica București, 1 - Universitatea de Vest Timișoara).

Membru al American Mathematical Society (din 2006).

Recenzent la Mathematical Reviews (din 2004) [72 recenzi].

Recenzent la Zentralblatt MATH (din 2009) [61 recenzi].

Granturi

Director al granturilor:

- CNCSIS AT/243/2001 (Existența soluțiilor pentru unele clase de incluziuni de evoluție),
- CNCSIS AT/323/2002 (Incluziuni diferențiale cu restricții de fază),
- CNCSIS A/887/2005-2006 (Incluziuni diferențiale, incluziuni discrete și aplicații în control optimal și jocuri diferențiale).

Membru al granturilor:

- GAR 5260/1996 (Probleme calitative ale sistemelor de comandă și aplicații),
- GAR 2563/1997 (Studiul unor clase de sisteme de comanda și aplicații),
- GAR 110/1998 (Aplicații ale algebrelor Lie și probleme de comanda pentru sisteme deterministe și stocastice),
- CNCSIS A/726/2002-651/2003,2004 (Metoda programării dinamice în teoria jocurilor diferențiale),
- CERES C4/187/2004-2006 (Modelare matematică: rezultate abstracte și aplicații),
- POSDRU 56/1.2/S/32768/2011-2013 (Formarea cadrelor didactice universitare și a studenților în domeniul utilizării unor instrumente moderne de predare-învățare-evaluare pentru disciplinele matematice în vederea creării de competențe performante și practice pentru piața muncii),
- PN/II/ID/PCE/3/0198/2011-2016 (Studiu calitativ al ecuațiilor diferențiale cu argument deplasat cu aplicații la modelarea și simularea tratamentului leucemiei),

LISTA DE PUBLICAȚII

A. Cărți

1. Incluziuni diferențiale și aplicații, Editura Universității din București, 2000.
2. Incluziuni diferențiale hiperbolice și control optimal, Editura Academiei Române, București, 2001.
3. Aspecte calitative în teoria incluziunilor diferențiale, Editura Cartea Universitară, București, 2004.
4. Control optimal pentru incluziuni cu întârziere, Editura Matrix Rom, București, 2006.
5. Incluziuni diferențiale semiliniare de ordinul al doilea în spații Banach, Editura Matrix Rom, București, 2008.
6. Elemente de teoria ecuațiilor diferențiale, Editura Universității din București, 2010.
7. Introducere în teoria controlului optimal, Editura Universității din București, 2012.
8. Ecuații diferențiale ordinare cu aplicații în mecanică, fizică și inginerie, Editura StudIS, Iași, 2013 (cu I. Cașu, D. Comănescu, S. Comşa, G. Cosovici, E. Popescu, I. Toma).

B. Articole publicate în reviste „peer review”

1. Regularity properties of the value functions in optimal control, Studii și Cercetări Matematice, vol. 46, nr. 1, 1994, pag. 3-10 (cu C. Boboc).
2. Conditions nécessaires d'optimalité pour les solutions d'une inclusion différentielle avec contraintes d'état, Bulletin of the Polish Academy of Sciences, Mathematics, vol. 43, nr. 2, 1995, pag. 169-173.
3. Minimum principle for some classes of nonconvex differential inclusions, Analele Științifice ale Universității „Al. I. Cuza” Iași, Matematică, vol. 41, nr. 2, 1995, pag. 307-324 (cu Ș. Mirică).
4. Continuous imbedding of a solution of a differential inclusion, Studii și Cercetări Matematice, vol. 48, nr. 1-2, 1996, pag. 15-23 (cu Ș. Mirică).
5. Quasitangent differentiability and derived cones to reachable sets of control systems, Nonlinear Differential Equations and Applications, vol. 4, nr. 2, 1997, pag. 169-184 (cu Ș. Mirică).
6. Continuous version of Filippov's theorem for a semilinear differential inclusion, Studii și Cercetări Matematice, vol. 49, nr. 5-6, 1997, pag. 319-330.
7. Some qualitative properties of the solution set of an infinite horizon operational differential inclusion, Revue Roumaine de Mathématiques Pures et Appliquées, vol. 43, nr. 3-4, 1998, pag. 317-328.
8. A Filippov type existence theorem for an infinite horizon operational differential inclusion, Studii și Cercetări Matematice, vol. 50, nr. 1-2, 1998, pag. 15-22.
9. Finite state constraints in optimal control of differential inclusions, Studii și Cercetări Matematice, vol. 50, nr. 5-6, 1998, pag. 327-336.

10. Derived cones to reachable sets of differential inclusions, *Mathematica*, vol. 40(63), nr. 1, 1998, pag. 35-62 (cu Ș. Mirică).
11. On an integral inclusion with delays and shifts, *Analele Universității București, Matematică-Informatică*, vol. 47, Special Issue, 1998, pag. 65-72.
12. Continuous selections of solutions sets of nonlinear integrodifferential inclusions, *Revue Roumaine de Mathématiques Pures et Appliquées*, vol. 44, nr. 3, 1999, pag. 341-351.
13. On a nonlinear integrodifferential inclusion, *Mathematica*, vol. 41(64), nr. 1, 1999, pag. 31-37.
14. On the set of solutions of a nonconvex integral inclusion, *Bulletin Mathématique de la Société des Sciences Mathématiques de Roumanie*, vol. 42(90), nr. 1, 1999, pag. 23-39.
15. On the solution set of a class of integrodifferential inclusions, *Analele Universității București, Matematică-Informatică*, vol. 48, nr. 2, 1999, pag. 21-28.
16. Some topological properties of a nonconvex integral inclusion, *Topological Methods in Nonlinear Analysis*, vol. 15, nr. 1, 2000, pag. 33-41.
17. Arcwise connectedness of solution set of an infinite horizon nonlinear integrodifferential inclusion, *Pure Mathematics and Applications*, vol. 11, nr. 2, 2000, pag. 161-171.
18. Derived cones via relaxation for differential inclusions, *Revue Roumaine de Mathématiques Pures et Appliquées*, vol. 45, nr. 1, 2000, pag. 77-91.
19. Necessary optimality conditions for hyperbolic differential inclusions with end point constraint, *Mathematical Reports*, vol. 2(52), nr. 2, 2000, pag. 163-173.
20. Qualitative properties of solution sets to a class of nonconvex nonclosed integral inclusions, *Analele Universității București, Matematică-Informatică*, vol. 49, nr. 2, 2000, pag. 123-131.
21. Some second-order necessary conditions for nonconvex hyperbolic differential inclusion problems, *Journal of Mathematical Analysis and Applications*, vol. 253, nr. 2, 2001, pag. 616-639.
22. A topological property of the solution set of an infinite horizon nonlinear integrodifferential inclusion, *Acta Mathematica Hungarica*, vol. 90, nr. 3, 2001, pag. 185-197.
23. On a certain converse statement of the Filippov-Ważewski relaxation theorem, *Commentationes Mathematicae Universitatis Carolinae*, vol. 42, nr. 1, 2001, pag. 77-81.
24. Variational inclusions on closed domains, *Bulletin Mathématique de la Société des Sciences Mathématiques de Roumanie*, vol. 44(92), nr. 3, 2001, pag. 243-251.
25. Existence of solutions to a class of evolution inclusions, *Nonlinear Analysis*, vol. 50, nr. 7, 2002, pag. 1025-1034 (cu V. Staicu).
26. On the set of solutions of some nonconvex nonclosed hyperbolic differential inclusions, *Czechoslovak Mathematical Journal*, vol. 52(127), nr. 1, 2002, pag. 215-224.
27. On the local existence of solutions to a class of nonconvex evolution inclusions, *Rendiconti del Circolo Matematico di Palermo*, vol. 51, Serie II, 2002, pag. 355-366.
28. On the existence of viable solutions for a class of second order differential inclusions, *Discussiones Mathematicae, Differential Inclusions, Control and Optimization*, vol. 22, nr. 1, 2002, pag. 67-78.

29. On the relaxation theorem for semilinear differential inclusions in Banach spaces, *Pure Mathematics and Applications*, vol. 13, nr. 4, 2002, pag. 441-445.
30. Local controllability of hyperbolic differential inclusions via derived cones, *Revue Roumaine de Mathématiques Pures et Appliquées*, vol. 47, nr. 1, 2002, pag. 21-31.
31. Necessary optimality conditions for a class of differential inclusions with state constraints, *Revue Roumaine de Mathématiques Pures et Appliquées*, vol. 47, nr. 3, 2002, pag. 295-304.
32. An approach to second-order necessary conditions for differential inclusions with state constraints, *Mathematical Reports*, vol. 4(54), nr. 2, 2002, pag. 161-169.
33. Existence of solutions to quasi-linear inclusions in non separable Banach spaces, *Mathematical Reports*, vol. 4(54), nr. 4, 2002, pag. 335-342.
34. Lipschitz-continuity of the solution map of some nonconvex hyperbolic differential inclusions, *Analele Științifice ale Universității „Al. I. Cuza” Iași, Matematică*, vol. 48, nr. 2, 2002, pag. 229-236.
35. On the solution map of some nonconvex integral inclusions, *Analele Universității București, Matematică*, vol. 51, nr. 1, 2002, pag. 15-22.
36. On the local existence of solutions to a class of second order differential inclusions, *Analele Universității București, Matematică*, vol. 51, nr. 2, 2002, pag. 117-122.
37. Directionally continuous selections and nonconvex evolutions inclusions, *Set-valued Analysis*, vol. 11, nr. 1, 2003, pag. 9-20 (cu V. Staicu).
38. Integrodifferential inclusions in non separable Banach spaces, *Demonstratio Mathematica*, vol. 36, nr. 3, 2003, pag. 591-602.
39. Existence for nonconvex integral inclusions via fixed points, *Archivum Mathematicum*, vol. 39, nr. 4, 2003, pag. 293-298.
40. Viable solutions of lipschitzian differential inclusions, *Revue Roumaine de Mathématiques Pures et Appliquées*, vol. 48, nr. 4, 2003, pag. 385-392.
41. On a second order potential type differential inclusion, *Mathematical Reports*, vol. 5(55), nr. 1, 2003, pag. 37-43.
42. A note on nonsmooth Lyapunov functions for state constrained differential inclusions, *Mathematical Reports*, vol. 5(55), nr. 4, 2003, pag. 283-292 (cu Ș. Mirică).
43. An existence theorem for some nonconvex hyperbolic differential inclusions, *Mathematica*, vol. 45(68), nr. 2, 2003, pag. 121-126.
44. Continuous selections for a class of set valued maps, *Analele Universității București, Matematică*, vol. 52, nr. 2, 2003, pag. 145-148.
45. On the relationship between the maximum principle and dynamic programming for optimal control problems under state constraints, *Revue Roumaine de Mathématiques Pures et Appliquées*, vol. 49, nr. 2, 2004, pag. 93-101.
46. Continuous interpolation of solutions of nonlinear integrodifferential inclusions, *Mathematical Reports*, vol. 6(56), nr. 2, 2004, pag. 123-130.
47. Existence of viable solutions for a class of nonconvex differential inclusions, *Mathematical Reports*, vol. 6(56), nr. 3, 2004, pag. 217-224.
48. Local existence of solutions to a class of nonconvex second order differential inclusions, *Mathematica*, vol. 46(69), nr. 1, 2004, pag. 25-32.

49. On stability for differential inclusions on closed domains, *Bulletin Mathématique de la Société des Sciences Mathématiques de Roumanie*, vol. 47(95), nr. 1-2, 2004, pag. 23-29.
50. On a nonconvex second order differential inclusion, *Bulletin Mathématique de la Société des Sciences Mathématiques de Roumanie*, vol. 47(95), nr. 3-4, 2004, pag. 159-165.
51. A connection between the maximum principle and dynamic programming for constrained control problems, *SIAM Journal on Control and Optimization*, vol. 44, nr. 2, 2005, pag. 673-703 (cu H. Frankowska).
52. Second-order necessary conditions for differential-difference inclusion problems, *Nonlinear Analysis*, vol. 62, nr. 6, 2005, pag. 963-974.
53. Viable solutions for a class of differential inclusions without convexity, *Pan-American Mathematical Journal*, vol. 15, nr. 4, 2005, pag. 13-20.
54. A note on viable solutions for a class of nonconvex differential inclusions, *Rendiconti del Circolo Matematico di Palermo*, vol. 54, Serie II, 2005, pag. 109-118.
55. Second-order necessary conditions for discrete inclusions with end point constraints, *Discussiones Mathematicae, Differential Inclusions, Control and Optimization*, vol. 25, 2005, pag. 47-58.
56. Controllability and maximum principle for discrete delay inclusions using derived cones, *Revue Roumaine de Mathématiques Pures et Appliquées*, vol. 50, nr. 1, 2005, pag. 19-29.
57. On the maximum principle for discrete inclusions with end point constraints, *Mathematical Reports*, vol. 7(57), nr. 1, 2005, pag. 13-20.
58. Viable solutions for a class of nonconvex functional differential inclusions, *Mathematical Reports*, vol. 7(57), nr. 2, 2005, pag. 91-103 (cu V. Lupulescu).
59. On controllability and extremality for discrete delay inclusions, *Mathematical Reports*, vol. 7(57), nr. 4, 2005, pag. 281-288.
60. Some remarks on differential inclusions with state constraints, *Mathematica*, vol. 47(70), nr. 1, 2005, pag. 39-48.
61. The maximum principle for discrete delay inclusions with end point constraints, *Bulletin Mathématique de la Société des Sciences Mathématiques de Roumanie*, vol. 48(96), nr. 3, 2005, pag. 277-284 (cu C. Georgescu).
62. On a class of differential inclusions governed by a sweeping process, *Bulletin Mathématique de la Société des Sciences Mathématiques de Roumanie*, vol. 48(96), nr. 4, 2005, pag. 361-367 (cu V. Lupulescu).
63. On the existence of viable solutions for a class of nonautonomous nonconvex differential inclusions, *Studia Universitatis „Babeş-Bolyai”, Matematică*, vol. 50, nr. 2, 2005, pag. 15-20.
64. Potential type functional differential inclusions, *Analele Universității București, Matematică*, vol. 54, nr. 2, 2005, pag. 223-228 (cu V. Lupulescu).
65. A note on the value function for constrained control problems, *Systems and Control Letters*, vol. 55, nr. 1, 2006, pag. 21-26 (cu H. Frankowska).
66. Minimum principle and controllability for multiparameter discrete inclusions via derived cones, *Discrete Dynamics in Nature and Society*, vol. 2006, ID 96505, 2006, pag. 1-12.
67. Derived cones to reachable sets of differential-difference inclusions, *Nonlinear Analysis Forum*, vol. 11, nr. 1, 2006, pag. 1-13.

68. On some second-order necessary conditions for discrete delay inclusion problems, *Mathematical Reports*, vol. 8(58), nr. 3, 2006, pag. 259-265.
69. A minimum principle for a class of discrete inclusions, *Mathematical Reports*, vol. 8(58), nr. 4, 2006, pag. 391-399.
70. On viability for nonautonomous nonconvex differential inclusions, *Analele Universității București, Matematică*, vol. 55, nr. 2, 2006, pag. 177-182.
71. Necessary optimality conditions for differential-difference inclusions with state constraints, *Journal of Mathematical Analysis and Applications*, vol. 334, nr. 1, 2007, pag. 43-53 (cu C. Georgescu).
72. Derived cones to reachable sets of discrete inclusions, *Nonlinear Studies*, vol. 14, nr. 2, 2007, pag. 177-187.
73. Controllability and extremality for differential-difference inclusions, *Communications on Applied Nonlinear Analysis*, vol. 14, nr. 2, 2007, pag. 23-34 (cu C. Georgescu).
74. An existence result for nonlinear integrodifferential inclusions, *Communications on Applied Nonlinear Analysis*, vol. 14, nr. 4, 2007, pag. 17-24.
75. On a second-order differential inclusion, *Atti del Seminario Matematico e Fisico dell'Università di Modena e Reggio Emilia*, vol. 55, nr. 1, 2007, pag. 3-12.
76. On the solution set of a nonconvex nonclosed higher order differential inclusion, *Mathematical Communications*, vol. 12, nr. 2, 2007, pag. 221-228.
77. On a second-order differential inclusion with constraints, *Applied Mathematics E-Notes*, vol. 7, 2007, pag. 9-15.
78. On the existence of solutions for a higher order differential inclusion without convexity, *Electronic Journal of Qualitative Theory of Differential Equations*, vol. 2007, nr. 8, 2007, pag. 1-8.
79. A viability result for a class of nonconvex differential inclusions, *Revue Roumaine de Mathématiques Pures et Appliquées*, vol. 52, nr. 1, 2007, pag. 1-8.
80. An approach to second-order necessary conditions for multiparameter discrete inclusions, *Revue Roumaine de Mathématiques Pures et Appliquées*, vol. 52, nr. 5, 2007, pag. 529-538.
81. A note on constrained second-order differential inclusions without convexity, *Mathematical Reports*, vol. 9(59), nr. 2, 2007, pag. 175-181.
82. Existence of solutions for a class of differential inclusions governed by a sweeping process, *Mathematical Reports*, vol. 9(59), nr. 4, 2007, pag. 335-341.
83. Existence of viable solutions for a class of nonconvex differential inclusions with memory, *Mathematica*, vol. 49(72), nr. 1, 2007, pag. 21-28 (cu V. Lupulescu).
84. A viability result for a class of nonconvex differential inclusions with memory, *Bulletin Mathématique de la Société des Sciences Mathématiques de Roumanie*, vol. 50(98), nr. 2, 2007, pag. 111-117.
85. On a nonlocal boundary value problem for a second order differential inclusion, *Analele Universității București, Matematică*, vol. 56, nr. 2, 2007, pag. 281-288.
86. On the solution set of a nonconvex nonclosed second order differential inclusion, *Fixed Point Theory*, vol. 8, nr. 1, 2007, pag. 29-37.
87. On the solution set of some classes of nonconvex nonclosed differential inclusions, *Portugaliae Mathematica*, vol. 65, nr. 4, 2008, pag. 485-496.

88. On the existence of mild solutions of a nonconvex evolution inclusion, Mathematical Communications, vol. 13, nr. 1, 2008, pag. 107-114.

4. The connection between the maximum principle and the value function for optimal control problems under state constraints, *Proceedings of 43rd IEEE Conference on Decision and Control*, Paradise Island, Bahamas, vol. 1, 2004, pag. 893-898 (cu H. Frankowska).
5. Some qualitative properties of solutions to nonconvex hyperbolic differential inclusions, *Proceedings of the International Conference on Differential Equations*, Hasselt 2003, Editori F. Dumortier, H. Broer, J. Mawhin, A. Vanderbauwhede, S.V. Lunel, World Scientific Publishing, Singapore, 2005, pag. 1048-1050.
6. Necessary optimality conditions for discrete inclusions, *Proceedings of the 7th Balkan Conference on Operational Research*, Bucureşti, 2007, pag. 39-44.
7. Necessary optimality conditions for hyperbolic discrete inclusions, *Applied Analysis and Differential Equations*, Editori O. Cârjă, I. Vrabie, World Scientific Publishing, Singapore, 2007, pag. 45-54.
8. Necessary optimality conditions for discrete delay inclusions, *Differential Equations, Chaos and Variational Problems, Progress in Nonlinear Differential Equations and Their Applications*, vol. 75, Editor V. Staicu, Birkhäuser Verlag, Basel, 2007, pag. 135-142.

9. On monotone solutions for a nonconvex second-order differential inclusion with memory, Proceedings of 8th IFAC Workshop on Time Delay Systems, Sinaia, Romania, Editor E. Petre, vol. 8, part I, 2009, pag. 337-340.
10. On a nonautonomous differential inclusion without convexity, Proceedings of the Sixth Congress of Romanian Mathematicians, Bucharest 2007, Editori L. Beznea, V. Brînzănescu, C. Calude, H. Ene, M. Iosifescu, S. Marcus, R. Purice, D. Timotin, vol. 1, Editura Academiei Române, Bucureşti, 2009, pag. 237-240.
11. Derived cones to reachable sets of semilinear differential inclusions, Proceedings of the 19th International Symposium on Mathematical Theory of Networks and Systems, Budapest, Hungary, Editor A. Edelmayer, 2010, pag. 235-238.
12. On controllability for fractional differential inclusions, Proceedings of 4th IEEE International Conference on Nonlinear Science and Complexity, Budapest, Hungary, 2012, pag. 127-130.
13. On the mild solutions of a class of evolution inclusions, Handbook of Evolution Equations, Editor G. M. N'Guerekata, Nova Science Publishers, New York, 2012, pag. 283-293.
14. On controllability for a nonlinear differential inclusion, Proceedings of the 17th International Conference on System Theory, Control and Computing, Sinaia, Romania, Editori E. Petre, M. Brezovan, 2013, pag. 109-112.
15. Existence of solutions for fractional differential inclusions with "maxima", Proceedings International Conference on Fractional Differentiation and its Applications, Novi Sad, Serbia, Editori D. T. Spasic, N. Grahovac, M. Zigic, M. Rapaic, T. M. Atanackovic, 2016, pag. 699-704.
16. On the existence of solutions for a nonconvex hyperbolic differential inclusion of third order, Proceedings of 10th Colloquium on Qualitative Theory of Differential Equations, Szeged, Hungary, Editor T. Krisztin, nr. 8, 2016, pag. 1-10.
17. A Filippov type existence theorem for some nonlinear q -difference inclusions, Differential and Difference Equations with Applications, Springer Proceedings in Mathematics and Statistics, vol. 164, Editori S. Pinelas, Z. Došlá, O. Došlý, P. Kloeden, Springer International Publishing Switzerland, Cham, 2016, pag. 71-77.
18. On the solutions of a quadratic integral inclusion, New Trends in Differential Equations, Control Theory and Optimization, Editori V. Barbu, C. Lefter, I. Vrabie, World Scientific Publishing, Singapore, 2016, pag. 73-79.
19. On the solution set of a nonconvex nonclosed second-order evolution inclusion, Proceedings of EQUADIFF 2017 Conference, Editori K. Mikula, D. Ševčovič, J. Urbán, Slovak University of Technology Publishing House, Bratislava, 2017, pag. 21-28.
20. Continuous selections of solution sets of a second-order integro-differential inclusion, Differential and Difference Equations with Applications, Springer Proceedings in Mathematics and Statistics, vol. 230, Editori S. Pinelas, T. Caraballo, P. Kloeden, J. Graef, Springer International Publishing Switzerland, Cham, 2018, pag. 53-65.
21. Differentiability properties of solutions of a second-order evolution inclusion, Nonlinear Analysis and Boundary Value Problems, Springer Proceedings in Mathematics and Statistics, vol. 292, Editori I. Area, A. Cabada, R. López Pouso, J.A. Cid, D. Franco, E. Liz, R. Rodriguez López, Springer Nature Switzerland, Cham, 2019, pag. 19-28.

22. Local controllability of a class of fractional differential inclusions via derived cones, Differential and Difference Equations with Applications, Springer Proceedings in Mathematics and Statistics, vol. 333, Editor S. Pinelas, J. Graef, S. Hilger, P. Kloeden, C. Schinas, Springer Nature Switzerland, Cham, 2020, pag 143-152.
